PRIYA SHARMA

Full Stack & Backend Software Engineer

San Jose, CA • (555) 876-5432 • priya.sharma.tech@email.com • linkedin.com/in/priyasharma • github.com/priyasharma

PROFESSIONAL SUMMARY

Full Stack Software Engineer with 2+ years of professional experience building web applications and backend APIs. Proficient in Node.js, TypeScript, Python, and modern relational databases (PostgreSQL). Experienced in deploying containerized services on Google Cloud Platform and maintaining clean, well-tested codebases.

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, Python, SQL, HTML5/CSS3
- **Frameworks & Backend:** Node.js, Express, FastAPI, Django, React, Redux, Next.js
- **Databases & Cloud:** PostgreSQL, MongoDB, Redis, Docker, GCP (Cloud Run, Cloud SQL, BigQuery), Firebase
- **DevOps & Tools:** Git, GitHub Actions, Jest, PyTest, Postman, Linux, REST APIs

WORK EXPERIENCE

Software Engineer | FinEdge Technologies, San Jose, CA **Oct 2023 – Present**

- Developed and maintained scalable REST APIs using Node.js and TypeScript for a transaction monitoring platform.
- Refactored relational schemas in PostgreSQL and implemented indexed materialized views, reducing dashboard report generation time by 35%.
- Built responsive client portals with React and TypeScript, integrating OAuth2 authentication and role-based access control.
- Containerized backend microservices using Docker and set up automated CI/CD workflows via GitHub Actions for deployment onto GCP Cloud Run.
- Wrote unit and integration test suites using Jest and Supertest, achieving 84% code coverage across core billing modules.

Junior Software Developer | Apex Data Labs, San Jose, CA **Jun 2022 – Sep 2023**

- Created internal automation scripts and data ingestion pipelines in Python to process daily CSV and JSON feeds.
- Collaborated in an Agile Scrum team of 7 developers, participating in daily standups, backlog grooming, and bi-weekly sprint reviews.
- Investigated and fixed 40+ client-reported defects in web UI and backend API layers.

PROJECTS

Real-Time Collaboration Board (Node.js, Socket.io, React, MongoDB)

- Built a real-time collaborative workspace supporting live cursor tracking, multi-user document edits, and state synchronization.

Financial Portfolio Tracker (Python, FastAPI, PostgreSQL)

- Designed an asset tracking API consuming third-party market data feeds, caching responses with Redis.

EDUCATION

San Jose State University, San Jose, CA • Bachelor of Science in Software Engineering **Aug 2018 – May 2022** • GPA: 3.65/4.0

Relevant Coursework: Software Engineering, Data Structures, Web Development, Database Management, Object-Oriented Analysis.
